

USING YOUR UL DEGREE

YOUR DEGREE IN CIVIL ENGINEERING ...WHAT NEXT??

Careers open to you with a degree in Civil Engineering

- [Construction and Civil Engineering](#)

The details of a career path can vary depending on market forces and the preference of the graduate. In some fields and in some firms, entry-level engineers work primarily monitoring construction in the field, serving as the "eyes and ears" of more senior design engineers; while in other areas, entry-level engineers perform the more routine tasks of analysis or design.

More senior engineers can move into doing more complex analysis or design work, or management of more complex design projects, or management of other engineers, or into specialised consulting e.g., offshore engineering, high-rise design and forensic engineering.

Other Career areas you might want to investigate*

- [Fire and Safety, Research, Patents, Technical Sales and Marketing, Technical Writing, non Technical Areas](#)

*Postgraduate study and relevant work experience will almost certainly be required to specialise in many of these areas. Having an honours degree in any area can be a stepping stone towards a huge variety of careers. Contact us at www.ul.ie/careers if you want to find out more about these and other career areas

Going on to Further Study

- [Faculty of Science and Engineering, UL](#)
